

AETHERIUM

W H E R E D E F I M E E T S P L A Y

VISION & MISSION

Vision: Bridge DeFi, GameFi, and real-world assets into a single global entertainment-finance ecosystem.

Mission: Deliver sustainable yields and gamified experiences that empower users and partners worldwide, with VEXA as the core value-accrual token backed by real activity across staking, GameFi, and prediction markets.

AetheriumX is the gateway where finance becomes engaging and play creates value.

PROBLEM STATEMENT

DeFi Today: Many projects rely on unsustainable yields or token inflation.

GameFi Today: Speculative hype, weak retention, no real-world value backing.

Market Gap: Users want fun + sustainable value, partners want transparency + long-term growth.

OUR SOLUTION

01

Dual-token engine (AXT + VEXA)
AXT powers liquidity, games, and platform fees, while VEXA acts as the value-accrual token through a structured buyback-and-burn mechanism that captures long-term ecosystem growth.

02

Genuine sustainable yield engine
Users stake major assets such as USDT, ETH, BNB, and SOL, mapped to diversified DeFi, CeFi, and Real-World Asset (RWA) strategies with transparent on-chain accounting.

03

GameFi & prediction markets that feed VEXA
Casual, betting-style GameFi and the AXT Predict market are designed to continuously create demand for VEXA:

- 5% of each game's total prize pool plus 10% of the loser's AXT are used to buy back and burn VEXA.
- A defined portion of the prediction market house edge is also allocated to VEXA buyback-and-burn.

04

Community-first DAO & future wallet
Governance and incentives are aligned via VEXA, with a planned non-custodial wallet offering VEXA-based fee discounts, rewards, and premium access across the ecosystem.

01

Stake major crypto assets to earn stable yields plus AXT rewards.

02

AXT is used for games, fees, and NFTs. Game activity and platform fees are routed into VEXA buyback-and-burn instead of unchecked inflation.

03

Users re-stake AXT to mint VEXA, the governance and premium-access token that captures long-term ecosystem value.

04

AXT pools fuel play-to-earn; 5% of every game pool plus 10% of the loser's AXT are used to buy back and burn VEXA, turning gameplay volume into structural deflation.

05

AXT Predict charges fees and house edge in AXT. Users can pay part of the fees in VEXA for 20–50% discounts, while a share of the house edge is used for VEXA buyback-and-burn.

06

NFT fragments and synthesis, along with referral and team systems, boost yields and rewards, while staking VEXA unlocks higher limits, special markets, and bonus multipliers.

CORE MECHANISM

05

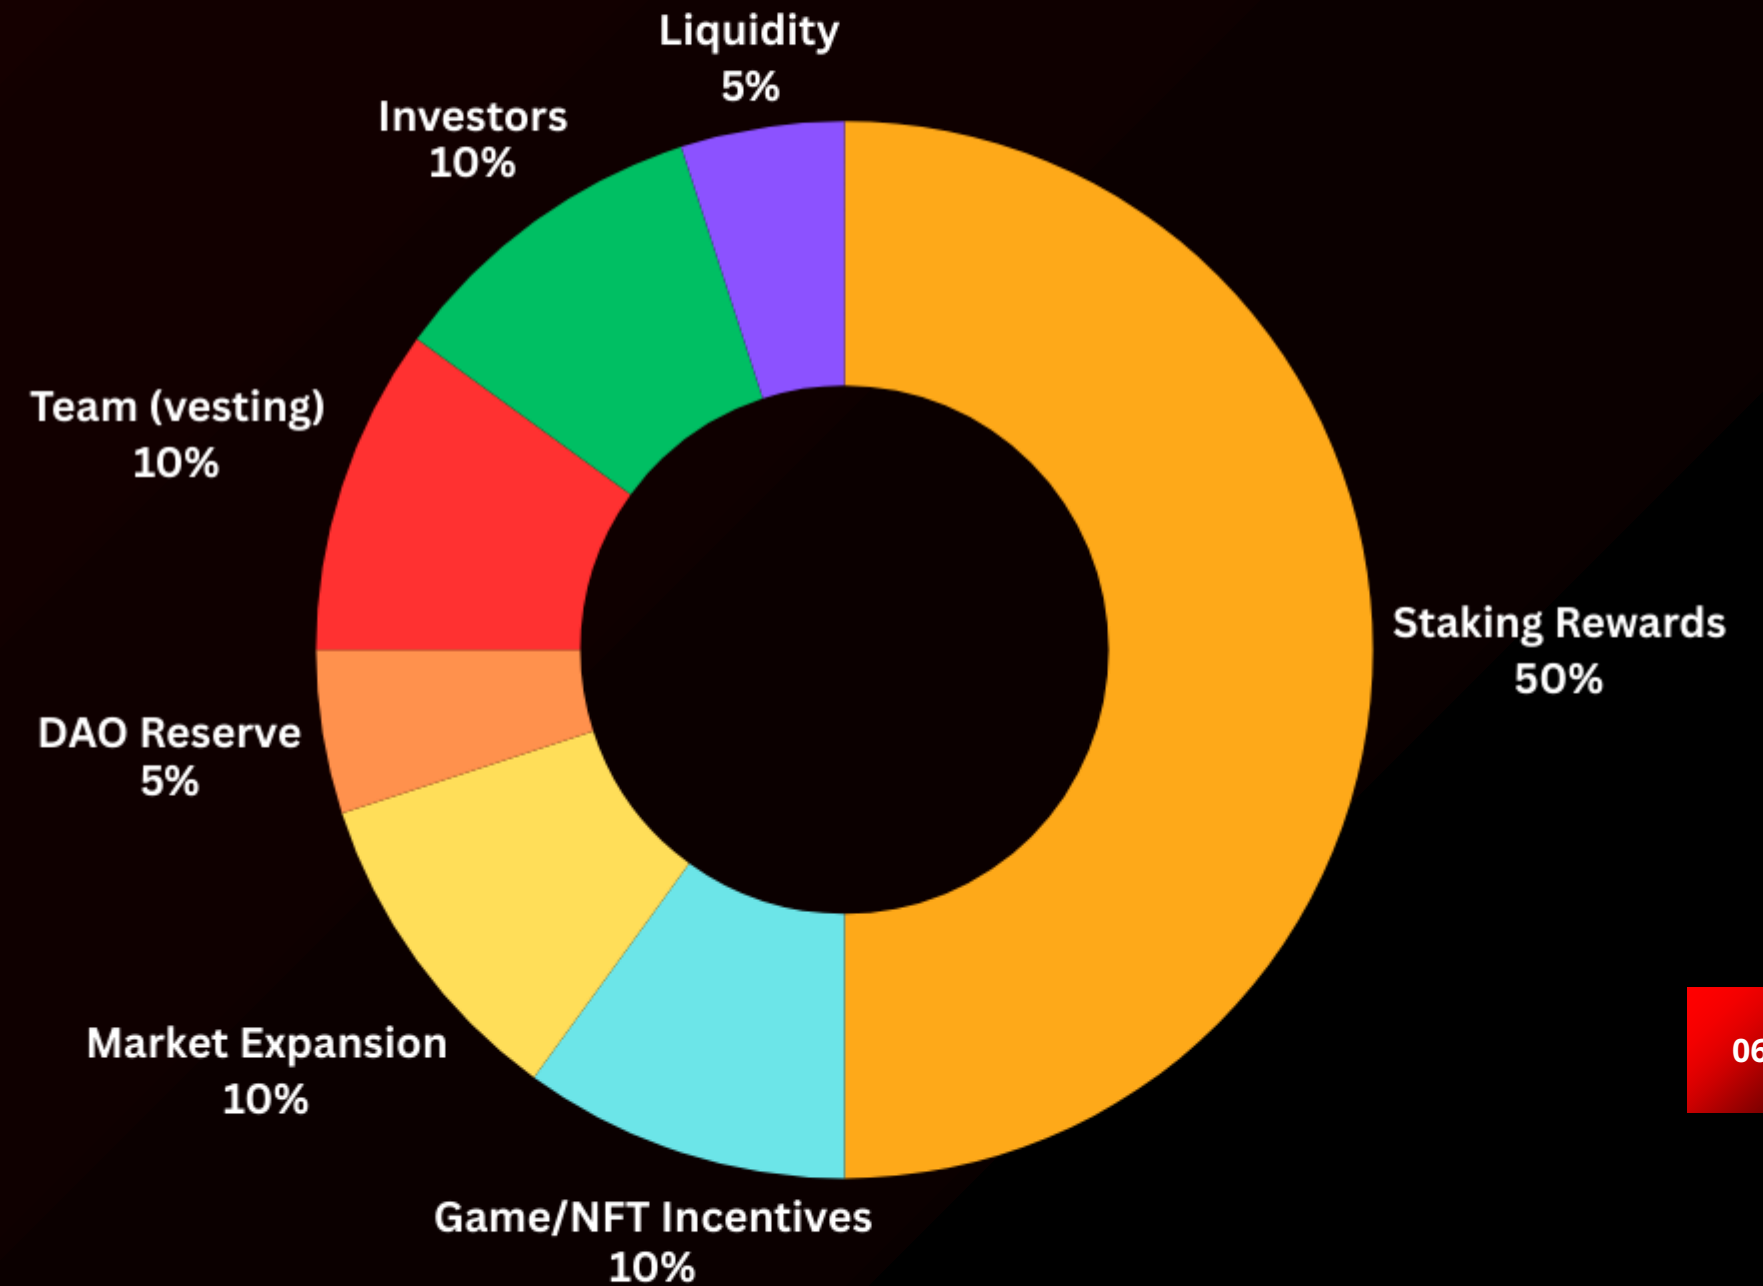

TOKENOMICS

AXT Token Distribution (10B Total Supply)

- Staking Rewards Pool: 50% (5,000,000,000 AXT)
- Game & NFT Incentives: 10% (1,000,000,000 AXT)
- Marketing & Expansion: 10% (1,000,000,000 AXT)
- Core Team: 10% (1,000,000,000 AXT)
- Investors & Partners: 10% (1,000,000,000 AXT)
- DAO Reserve: 5% (500,000,000 AXT)
- Initial Liquidity: 5% (500,000,000 AXT)

Total Supply: 10,000,000,000 AXT

- Core Team: 0% TGE, 12-month cliff, 36-month linear vesting.
- Investors & Partners: up to 10% TGE, 3-month cliff, 18-month linear vesting.
- Initial liquidity locked for 12 months.
- GameFi → VEXA Buyback: 5% of each game's gross AXT pool plus 10% of the loser's AXT, settled daily and used to buy back and burn VEXA.
- Protocol Buybacks: $\alpha \times \text{platform fees} + \beta \times \text{RWA yield}$ allocated to VEXA buyback-and-burn (initially $\alpha = 30\%$, $\beta = 50\%$, adjustable via DAO).

TOKENOMICS

VEXA Token Distribution (100M Total Supply)

- Re-staking User Rewards & Team Incentive Pool: 50% (50,000,000 VEXA)
- DAO Governance Incentive Pool: 5% (5,000,000 VEXA)
- Strategic Partnership & Ecosystem Fund: 20% (20,000,000 VEXA)
- Development & Community Contribution Rewards Pool: 10% (10,000,000 VEXA)
- Core Team Incentives: 10% (10,000,000 VEXA)
- Initial Liquidity Pool: 5% (5,000,000 VEXA)

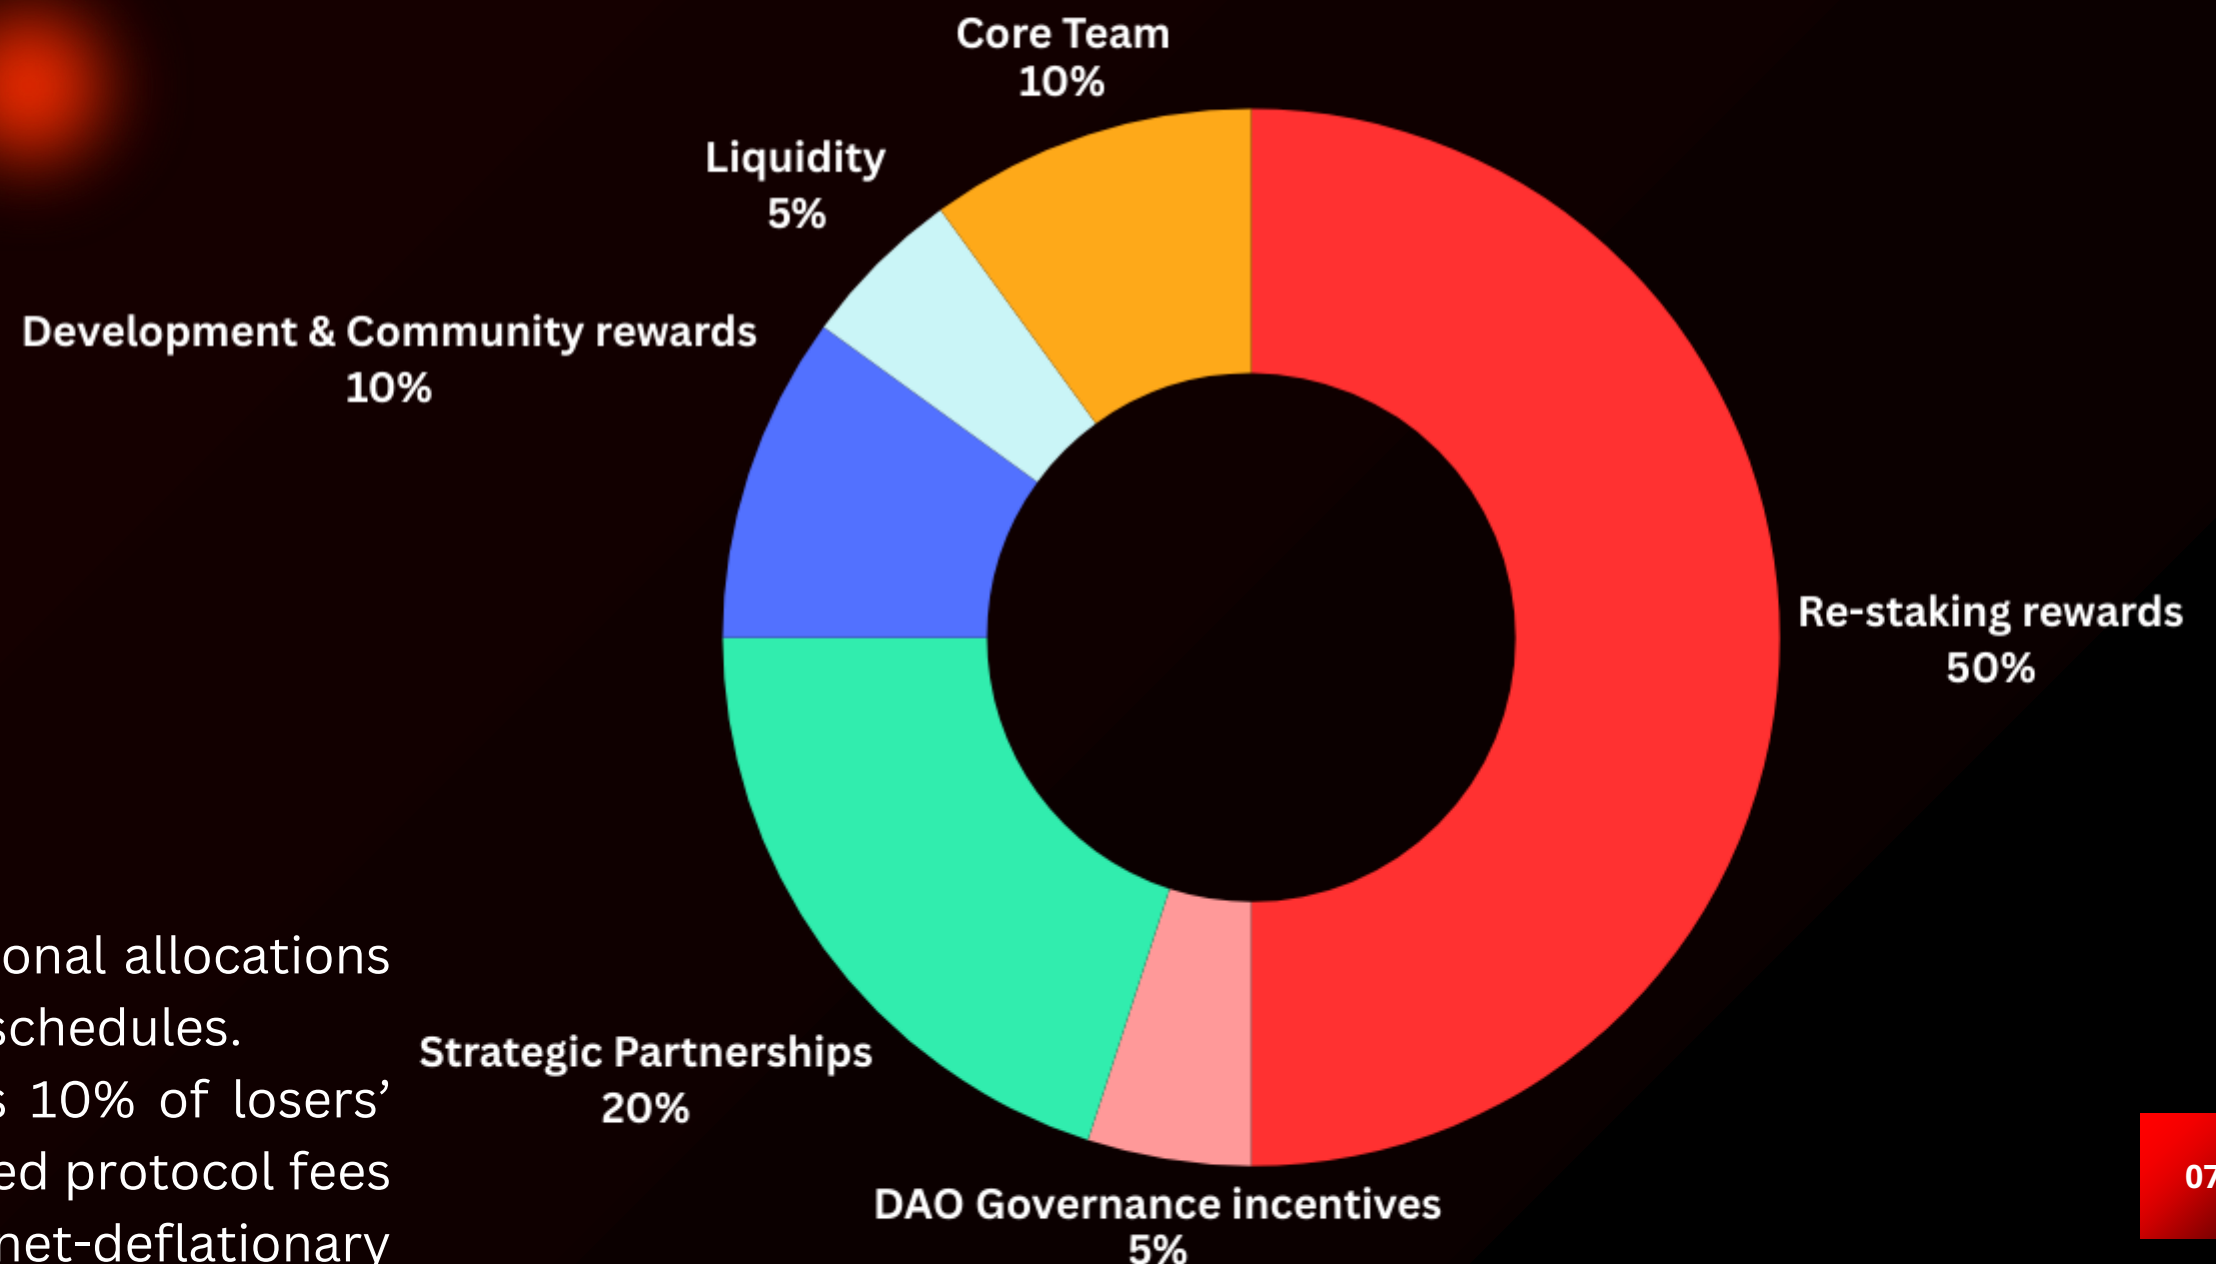

Total Supply: 100,000,000 VEXA

Hybrid Model & Deflation:

VEXA is primarily minted via AXT re-staking, with additional allocations pre-minted and time-locked under transparent vesting schedules.

At the same time, GameFi rake (5% of each pool plus 10% of losers' AXT), a share of the AXT Predict house edge, and selected protocol fees are all used to buy back and burn VEXA, targeting a net-deflationary supply curve as ecosystem volume grows.

- Re-staking rewards
- DAO Governance incentives
- Strategic Partnerships
- Development & Community rewards
- Liquidity
- Core Team

MARKET OPPORTUNITY

01

·DeFi TVL: \$100B+ global.

02

·GameFi Market: \$15B+, fast growth.

03

·RWA Tokenization: Trillion-dollar opportunity.

04

·Convergence Space: No project effectively merges DeFi + GameFi + RWA at scale.

05

·Target Audience: Gamers, DeFi stakers, NFT collectors, partners.

ROAD MAP

2025 Q3-Q4: MVP launch (staking, games, NFT marketplace).

2026 H1: DAO launch, non-custodial wallet app with VEXA-centric rewards and fee discounts, and multi-chain ecosystem expansion.

SOON

2026 H1: DAO, wallet app, multi-chain expansion. marketplace).

2027: Global scale, U-Card real-world POS payments.

COMPETITIVE ADVANTAGES

01

·Real Yields: Backed by DeFi, CeFi, and RWAs.

02

·AXT powers liquidity and usage; VEXA captures value via GameFi- and fee-driven buyback & burn.

03

·Sustainable Economy: Not only backed by real on-chain and off-chain yield sources, but also designed as a dual-token system where AXT powers liquidity and product usage, while VEXA captures value through a structural buyback-and-burn engine fed by GameFi volume, prediction markets, and protocol fees.

04

·Community Power: DAO governance with incentives.

05

·Community Power: DAO governance with incentives.

CALL TO ACTION

For Users

Stake, play, earn, govern

For Partners

Join our ecosystem, co-develop, expand globally

FOR INVESTORS

For Investors

Capture value at the intersection of DeFi, GameFi, and RWAs.

AetheriumX — Where DeFi meets play.

OUR TEAM

CEO Paula Brukaite

Mrs. Paula Brukaite is an accomplished marketing leader with more than a decade of experience across Web2 and Web3 ecosystems. She has led brand growth, fundraising, and community initiatives as CMO at Open Network Ltd and fractional CMO at Supernova Games Studio, and oversaw marketing for tokenized gaming and infrastructure projects at IBC Group.

Mr. John-Claude Chamandi has deep expertise in Web3 growth, user acquisition, and community engagement. Before joining AetheriumX, he served as CMO at NoCap Marketing, leading global marketing strategy and execution. Previously, as Head of Growth at Mars4, he grew the user base from 5,000 to 30,000 in nine months. He also led community growth at Veracity and drove full-funnel marketing at BESK.

CMO John-Claude Chamandi
